REASONS FOR ALLOWANCE

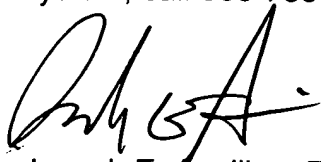

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not provide for, nor suggests providing for a first sharing partner which allow each partner to select a portion of private data, replicate the data to produce a portion of the private data which is associated with the second sharing partner by creating a data tag with a data tag including a first sharing partner accessible to only the first sharing partner, push the data to the second partner, selecting a portion to provide a second private data portion and associating the data with the first sharing partner, pushing the data back to the first sharing partner as an updated replicated data portion to replace the first replicated data portion. The second user is able to update the first portion of data that was previously sent to the second user on the first user's machine. The private data portion is copied to a shared memory associated with the first sharing partner which is only accessible to the first sharing partner. The data is then transmitted over to the second sharing partner's shared memory via a "write-only" data path, which allows the second partner to send data to the first partner, but does not allow the first partner to hack into the second partner's memory (p. 3, lines 25-30). This greatly increases the security of the system. This system is to be utilized for the sharing of military data between military allies. Data can only be shared with other partners if it is first copied into the sharing memory (Figure 1A, ref. 22). For the above reasons, in conjunction with the other limitations of the independent claims, puts this case in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
